

# Unity Interface Panel OS Release Notes

## (Latest to Earliest)

### RELEASE NOTES FOR 11.00

#### Email

- Added the Email feature to System Overview allowing the User to configure system-wide email configuration data as well as send test notifications.

#### Panel – Pressures and Temperatures

- Added pressure and temperature unit dropdowns to the “Panel” page that allows a user to select and distribute system-wide unit settings to all networked products.

#### Language

- Added Spanish language to the Unity Interface Panel

#### Login Keypad Modal

- Updated the Keypad modal to match other Unity products

#### Product Selection Dropdown

- Added code allowing the Product Selection dropdown to be functional even if there were no Unity products networked to the system

#### Setpoint Maintenance

- Fixed an issue where local setpoints were not visible after being saved
- Fixed the “Restoring Setpoints” function to also restore the network information

#### Email - SMTP Factory Settings #2

- Fixed an authorization mismatch that caused emails and notifications using the Factory Settings #2 option to fail to send

#### Add Factory Card Page

- Fixed an issue preventing a user from opening the System Overview menu modal while accessing the Add Factory Card page

#### Panel Temperature Selection

- Fixed an issue where changing the temperature units from F to C or C to F was not distributed to all products within the Quantum HD Unity Network

#### Panel Pressure Units

- Added kpaG as an option to the pressure units dropdown on the panel page

#### Setpoint Maintenance

- Established the length of a Saved Setpoints filename, preventing the Submit button on the Restore Setpoint page from being pushed off the page
- Added a check to prevent the entering of invalid characters while saving a setpoints file that caused the save function to fail

#### Clean Screen Timeout

- Changed the default timer for the Clean Screen feature from 1 minute to 30 seconds
- Changed the units for the Clean Screen timer to be seconds rather than minutes

#### URL Field

- The URL field has been removed from the Edit page in the product list

#### About Screen

- Added additional fields to the “About” page that shows the board type, distinguishing between Q5 and Q6 processors
- Added range checking to the Sales Order Number and Item Number fields on the “About” page to ensure the numbers entered are valid
- Changed the card field to now display the storage architecture being used in the system

#### Network Restore

- Fixed an issue where the network settings were not changed to default values after performing a network restore via the DIP switch

#### Security - Restore Default Users

- Added a feature that automatically Logs Out a User if they choose to restore default users while not logged in as one of those groups

### Security Users

- Fixed an issue where a default user level (Basic, Operator or Service) could be deleted if it was first moved to another user level
- Added code that requires a new Security User to have a PIN code before they can be added to the list of users
- Added code preventing the loss of the PIN code when editing a Security User

### Remote Users Page

- Added a “Session List” to the Security page that allows a user (local or remote) to see other users who are or have been remotely logged in to the panel

### Number Entry

- Added code to make the displayed keypad consistent when clicking on a setpoint field in an unexpected way

### On Screen Keyboard

- Corrected the Shift and Caps Lock functions on the on-screen keyboard

### Network Configuration

- Added a check that prevents the entering of invalid network configurations which cause the controller to malfunction.

### IP Address Range

- Added a check that prevents the entering an invalid IP address and port number which causes the controller to lose connectivity with other Quantum HD Unity products

### Compressor Overview

- Fixed an issue on the System Overview page where a Unity product in “Shutdown” was incorrectly shown as being in a “Warning” state

### Remote Auto Login

- Fixed an issue where Auto Login failed when the Quantum HD Unity network contained more than one compressor controller

Networked Product O.S. Version Message

- Changed the Network List page updating the message requiring all Unity products to be O.S. version 10.40 or later
